FOOTING EXCAVATION OBSERVATION REPORT

DATE FOOTINGS OBSERVED: 12/4/2020

PROJECT NO.: T-7250-2-1

PROJECT NAME: Kelkari Phase 2

PROJECT LOCATION: Issaquah, WA

CONTRACTOR: Intercorp

REPRESENTATIVE: Matt Howey

DESCRIPTION COVERED BY THIS REPORT: Building 3 First Floor Footings

Permit #: BLD18-00228

| FOOTING EXCAVATION | FIELD CONDITIONS NOTED |
|---|--|
| Foundation Excavation for Building 3 First Floor Footings | Footings were observed to be medium dense to dense, |
| | firm and unyielding, using a 1/2" metal T-Probe advanced |
| | manually until refusal. The results were consistent with |
| | our expectations |
| | |
| | |
| | |
| | |

NOTES: Soil conditions observed are consistent with those expected and are suitable for support of foundations designed for an allowable bearing capacity of 2,500 pounds per square foot (psf).

Our representative has observed only the footing excavations listed above. The results of this observation are only valid for a period of 48 hours. If any change in the subgrade occurs, we should be promptly notified. Any loosened soils observed in foundation areas due to construction activity or rainfall should be removed prior to concrete placement.
